

I am a very frequent flyer and manager responsible for millions of dollars of business. I would like to submit my STRONG opposition to the proposal of allowing cell phones on airplanes. I am as busy and "needed" as any business person sitting next to me but not having access to my cell phone has not been an issue in the more than a million miles I have flown in the last 5 years. The irritation of having someones phone ringing throughout an aircraft or the ubiquitous "loud talker" sitting next to me more than negates my need to have cell phone access. I am also very concerned about tempers flying and my safety when inconsiderate people cause an issue between passengers. This will happen when it is a long flight and people are trying to sleep or work and phones ring and people speak too loud. Please do not allow cell phone usage.
